ADVERSE REACTIONS

A vaccine, like any medicine, is capable of causing serious problems, such as severe allergic reactions. The risk of any vaccine causing serious harm, or death, is extremely small. Local symptoms may include: slight tenderness, redness, itching or swelling at the site of injection.

Systemic symptoms may include: fever, malaise and muscle pain. Other systemic symptoms may occur infrequently. These reactions usually begin 6 to 12 hours after immunization and can persist for a few days. Immediate presumable allergic reactions such as hives, angioedema, allergic asthma or systemic anaphylaxis occur rarely after immunization. These reactions may result from hypersensitive reactions in people with severe egg allergy, and such people should not be given certain vaccines that contain eggs. People with documented immunoglobulin E (IgE)- mediated hypersensitivities to eggs or any other vaccine components, including thimerosal, may also be at increased risk of reactions from immunizations.

In the case of a severe reaction such as a high fever, behavior changes or flu-like symptoms that occur after vaccination, see a doctor right away. Signs of an allergic reaction can include difficulty breathing, hoarseness or wheezing, hives, paleness, weakness, a fast heartbeat, or dizziness within a few minutes to a few hours after the shot.

I understand that serious injury or death can result from any vaccination and in consideration of receiving the vaccination(s) checked above, voluntarily assume the risk of and accept full liability for any and all injuries and death which may occur as a result of my vaccination(s). I agree to release Carlbert Drugs Inc., d/b/a Buckley's Drug Store its agents, representatives, employees, servants, officers, successors and heirs from any and all liability for giving me (or the individual on whose behalf I am signing) the vaccination. I agree to indemnify, defend, and hold the Indemnities harmless from any claim made by any person (including the individual on whose behalf I am signing). I understand there is no assurance that the vaccine will prevent the applicable disease. I have been explained the benefits and possible side effects of the vaccine and request that the vaccine be given to me. My signature on this form means that all of the information provided in this Application and consent form are true to the best of my knowledge. I understand that this form and my signature below are binding on me and my heirs, successors and personal and legal representatives as well as those of the person on whose behalf I am signing. If I am not the person being vaccinated, I warrant that I have the authority to give this consent for the person to be vaccinated.
